

NATIONAL PETROLEUM COUNCIL

**APPROVED 4/23/2024 SUBJECT TO FINAL EDITING**

**CHARTING  
THE COURSE**  
Reducing GHG Emissions from the  
U.S. Natural Gas Supply Chain

**APPENDIX B**

April 23, 2024

# Appendix B

## Study Group Rosters

### STUDY PARTICIPATION

Participants in this study contributed in a variety of ways, ranging from work in all study areas, to involvement on a specific topic, or to reviewing proposed materials. Involvement in these activities should not be construed as endorsement or agreement with all the statements, findings, and recommendations in this report. Additionally, while U.S. government participants provided significant assistance in the identification and compilation of data and other information, they did not take positions on the study's recommendations.

As a federally appointed and chartered advisory committee, the NPC is solely responsible for the final advice provided to the Secretary of Energy. However, the Council believes that the broad and diverse participation has informed and enhanced its study and advice. The Council is very appreciative of the commitment and contributions from all who participated in the process.

This appendix lists the individuals who served on this study's Committee, Coordinating Subcommittee, Task Groups, Subgroups, and Teams, as a recognition of their contributions. In addition, the National Petroleum Council wishes to acknowledge the numerous other individuals and organizations who participated in some aspects of the work effort through outreach meetings or other contacts. Their time, energy, and commitment significantly enhanced the study and their contributions are greatly appreciated.

## **List of Study Groups:**

- Committee on GHG Emissions
- Coordinating Subcommittee
- Writing Team
- Chapter 1 – Baseline and Expected Pathways
- Chapter 2 – Societal Considerations & Impacts (SC&I)
- Chapter 3 – Detection Technology
- Chapter 4 – Life Cycle Analysis (LCA)
- Chapter 5 – Analytics and Trade-offs
